NO. 7.

FOR PRESIDENT,

JAS. G. BLAINE. OF MAINE.

FOR VICE PRESIDENT,

JOHN A. LOGAN. OF ILLINOIS.

The above ticket nominated at Chiago last week, is one that meets the bearty approval of a large majority of the people of the Union, and one which we believe will be elected by an overwhelming majority. Mr. Blaine has long been a recognized leader in the councils of the Nation. Perhaps o man living cause sway a multitude by the personal augustism of his pres nce, added to the grand-gift of ora tory which he possesses in a superlative degree.

One can hardly read the platform adopted with its promise of protection to American industries, and its pledge to reform existing abuses, and then tudy the action of the Plumed Knight in the past, as he has waged war for the right, and not leel that lie is pecuto fullest victory from this platform. John A. Logen in as he is perhaps more familiarly known, "The Soldiers Friend," is a tower of strength within unlocate strength warming the frame, be has steadily marched from the humbler walks of life, to a foremost position among his fellows.

Our space forbids an extended notice in this issue, but if not, it were epulices, as our readers are coemison of the grandeur of the men and the acts of their lives, and the enthusiasm shown at the announcement of their nomination will grow in strength until crowned with victory in Novem-

The addition of Logan to the ticket will add to the enthusiasm in the west, and bring at least an hundred thousand soldiers into the field as active workers for the brave and gallant Black Engle. No nam questions his honesty or his sincerity, and his recand will be searched in vain for valuer able points. From a sepublican standpoint but one objection can be mised against him, and this will doubtless beworked for all it is worth in the eastvirgities. When the greenlanck heresy was gilining a foothold in the west, Logan came very near being carried away with it. The hard money men of the ust may refuse to accept him because of the weakness he exhibited at a time when the best statesmen were put to the test. With Oliver P. Morton and mid-our awn Ferry drifting with the western tide, lingan's wavering etitudermay be overhooked and it will be counted to his greater that he sees covered his error and retraced hi teps - Detroit Journal.

FOUNTE BALLEY.

While the roll was being called on the fourth ballet five he not to impossible to restrain the exuberance of the vast audience whenever the name of Blaine was spoken. The very sound of it called the people to their feet they stood up on the chairs, ladded and all, and waved handkereniefs and hars and these many manufaces while the building shook with the thunder of cheers.

of cheers.

Before the official result was announced the following dispatch was preciped:

WANNOON, June 6—To ri. M. Cullom, The local preciped in the factor of the States that mirst be relied upon to elect the President having so strongly shown a prelocence for Mr. Blaine, i doesn it my duty not to the way of the promise; choice, and 

other stoff of cheering and wild entificients. To flatine, Mr. Simplement of Fearsty and a wild entificient william Walter, Pheins, of New Jerrey, and one or tro colored dolegates endeavored to see a hearing, and vooffernted and gestionated without succeeding in being heard, their voices being drowned in tumultous yells, cheers and demands for a call of the roll. Not deterred by their failure, Mr. Rossevelt, of New York, carried away by the excitement, get tipen his scat, wared his areas and appeared as if he was saying something; but not a word was heard from him. Finally, at 2:30, the taking of the fourth belief was begun. THE BALLOT IN DETAIL.

The Utility of Pain.

The utility of pain is seen in the mombrane which sweeps the surface of the eye, for instance in several animals, the eye, for instance in several animals, whenever any irritant particle is brought into contact with these delicatorstructures. The pain caused by the foreign body sets up reflexly a muscular contraction in this membrane, and thus it is brought across the eye, sweeping the surface, and so the offending matter is removed. When the foreign body is too, lixed, to be so removed, disorganization of the eye follows, and amid a general destruction of the organ the feritant matter is got rid of. Hiestruction of the eye in these animals would be a common occurrence if it were not for this miscular arrangement. were not for this muscular arrangement, were not for this pulseular arrangement, and paju is the excitant; it is, as it were, the inger that pulls the trigger, and the machinery already provided and prepared is set in action thereby. In man the suffering caused by a foreign body in the eye calls the attention to the pert and leads to its removal. It is were not for the puls so modured. It is were not for the pain so produced irremediable mischief would often be permitted to go on unchecked, because unnoticed. Not only does pain so defund the eye from the injurious effects of foreign bodies, but it often serves to protect the delicate organ from overwork; and where pain is so produced rest is given to the part, and recovery is instituted. Especially is this seen where the eyes are not an absolute pair, and the eyes are not an absolute pair, and long perusal of a page strains them. Proper spectacles making the eyes a pair give prompt and permanent relief. The grave diseases of the eye are those which are painless, where incipient disease is aggravated by persistent action. all of which would be avoided if pain were a consequence of the malady. #### Destroying Moths.

Destroying Metis.

The destruction by moths is one of the greatest vexations which careful house-keepers have to contend with, and their depredations are not to be remedied after they have once made inroads. Houses heated by furnaces are especially predisposed to have moths, but every house-keeper must be on the watch for them, for, from the time that the windows begin to be left open the trouble begins. Heavy carpets sometimes do not require taking up every year, unless in constant use. Take out the tacks from these, fold the carpets back, wash the floor in strong suds with a tea-spoonful of borax dissolved in them. Dash with insect powder or lay with toblace leaves along the edge and a ten-spoonful of bornx dissolved in them. Dash with insect powder or lay with toblaceo leaves along, the edge and retack. All moths can be kept away and the eggs destroyed by this means: Ingrain and other carpets, after shaking, are brightened by sprinkling a pound of salt over the surface and sweeping carefully and thoroughly. It is also an excellent plan to wipe off the carpet with bornx water, using a thick finnel cloth wrang lightly, taking care not to wet it, but only to dampen. Open the windows and dry the carpet before replacing the furniture—Other woolens, including blankets and wearing apparet, lucluding blankets and wearing apparel including biankels und wearing appeter, must be beaten and Irushed and folded amoothly. Be careful to clean every grease spot with ammonia and water, not too strong, and a dark woolen cloth. The pieces of camphor into little bundles and put one in each article. Wrap the article in newspaper, as printer's ink is a great preventuaive of moths, and sew thom min at rong sheeting hors, lathem up in strong sheeting bags, la-beled; so that it will not be necessary heled; so that it will not be necessary to open them during the summer except. for use. This is a good way for those who do not possess center boxes, and the articles need have no other care it every spot is treated as directed and the garments are not left hanging in the closet too long before putting away for the season. Cancer for Fourteen Years!

SPARTANDURG, S. C., March 14, 1884,
I have for it years been a sufferer from a running some on my face that every body culted a Cancer. I have used ever \$500 worth of medicine and found no relief. About four months ago I tought one hottly of Switch's Specific from Dr. H. E. Heintest, and since have bought five others, have taken it, and they have country at some and well! My face is as free from a sore as anybody's, and my health is perfectly restored. I feel lite forty years had been lifted off my head. Yours thankfully,

ALL weakness and ill health owes its origin to an impure state of the blood and a weakness of the urinary and digestive organs. A medicine that will strongthon these organs, and at the same time purify the blood, will assist nature in curing nearly every disease that human fiesh and blood is beit to. Such a remedy te Dr. Guysott's Yellow Dock and Sarasparille, and, although it messesses no eathurtie or diuretic effect, its use will soon establish a regular habit of body as well as cure weakness of the kidneys, indicated by urinary sodificats, nervousness, occ.

### STONES IN THE KIDNEY

Expelled by the Use of Dr. David Kenne dr's Favorite Homedy (of Rondout, K. Y.)-after Several Able Physicians had Foiled, and the Patient was Nearly Ready to Abandon Hope. The Substance of a Long and Grateful Letter.

One of the most remarkable cases that has ever been brought to the notice of the public is that of Mr. J. B. Boach, of Stone Ridge, Ulster Co., N. Y. Mr. Beach had suffered since October 18th, 1874, from the presence of Calculus or Stone in the right Kidney. No less than soven physicians were employed at different times, to whom Mr. Beach peid hundreds of dollars for medical treatment, with only temporary

medical treatment, with only temporary relief.

By the tirgent solicitations of his triends he was induced to try DR. DAVID KENNEDY'S FAVORITE REMEDY. He experienced a marked improvement from the first day he began to use the medicine: on the 16th of. September he voided a stone as large as could be passed through the natural channel.

Mr. Reach coincludes a long letter to Dr. Kennedy by saying: \*"It will always afford me plenaure. to recommend the FAVORITE REMIEDY to those who may be suffering from difficulties of the Kidney and Bladder, or any disorders arising from a impure state of the blood."
